

Project Development –Delivery of Sprint 3

Creating Cloudant DB and connecting to Node-RedCreate App in MIT App inventor

TITLE	IOT based child safety gadget for child safety monitoring and notification
TEAM ID	PNT2022TMID44407

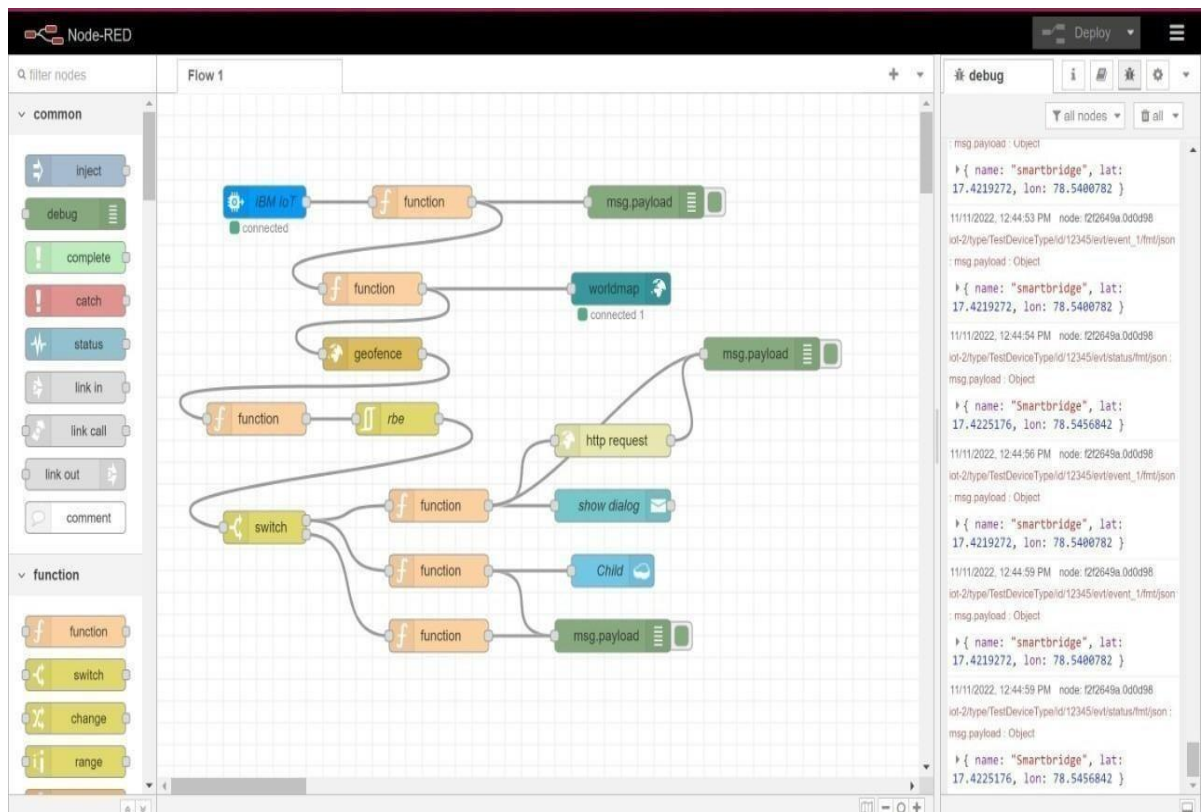

Create Cloudant DB:

The screenshot displays the Cloudant Databases management interface. On the left is a dark sidebar with various icons and a 'Log Out' button at the bottom. The main area is titled 'Databases' and includes a search bar labeled 'Database name' and a 'Create Database' button. Below this, a table lists the databases:

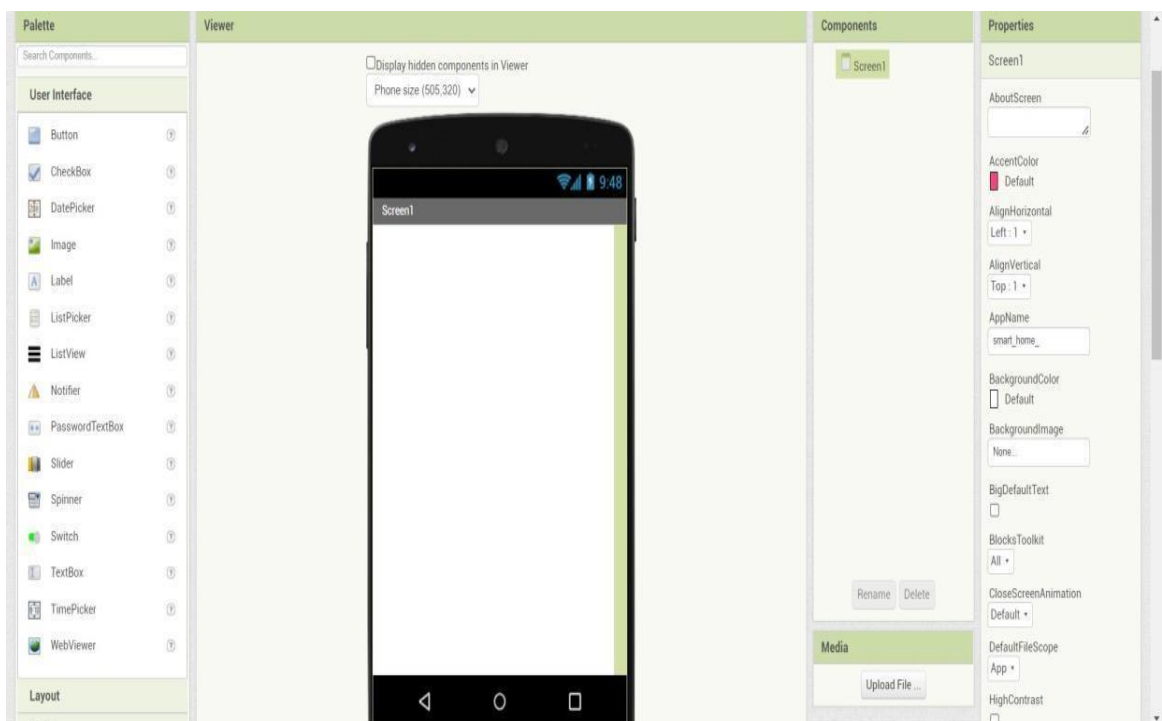

Name	Size	# of Docs	Partitioned	Actions
childsafety	14 bytes	1	No	[Icons for edit, lock, delete]
childsafetydb	15 bytes	1	No	[Icons for edit, lock, delete]

At the bottom right, there is a pagination bar showing 'Showing 1-2 of 2 databases', 'Databases per page' set to 20, and a page indicator '1'.

Node-Red Service with Clodant DB:

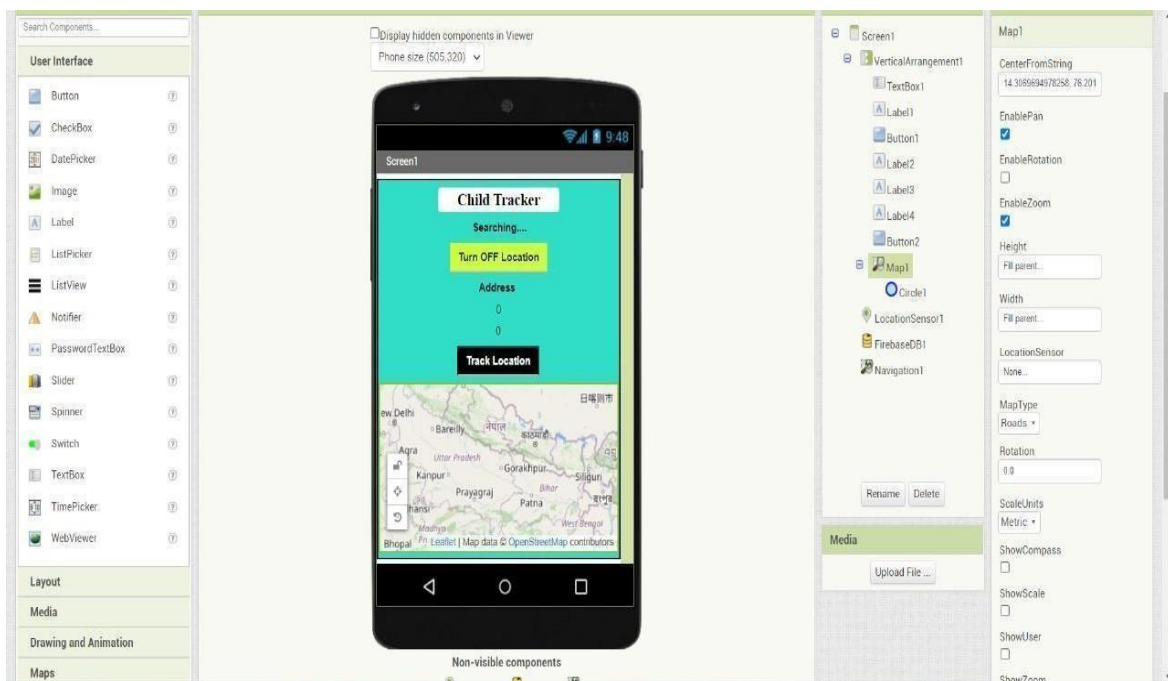

Create App in MIT app inventor:

Output(App inventor):

Location Status:
